

INTERACTIVE VISUAL GYM / FIGURE PROOF

environments_e | 5.5-inch manuscript width; view or print at 100%

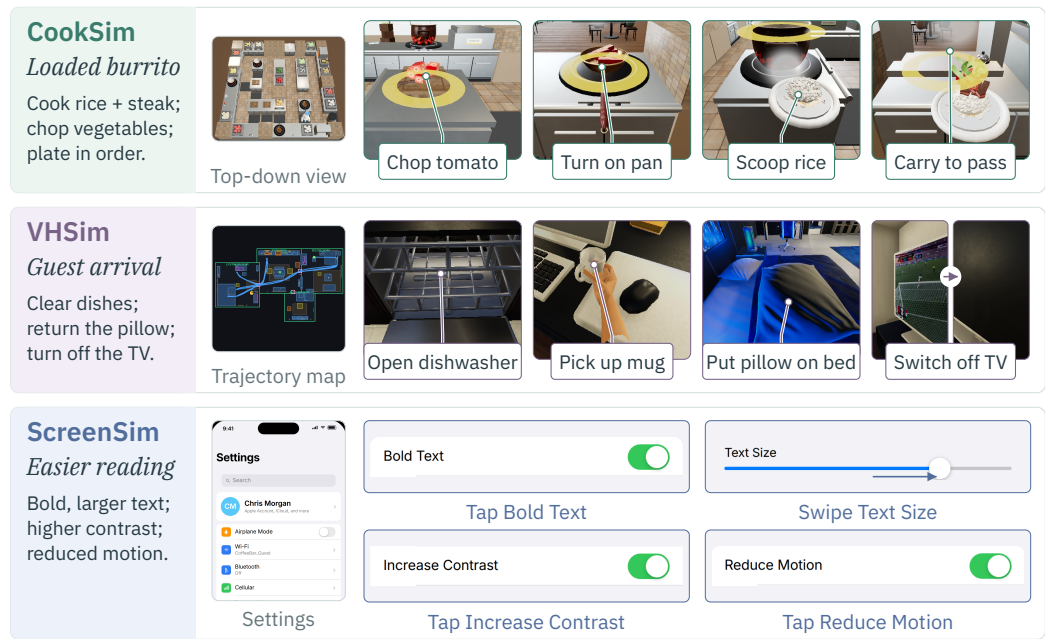

Example tasks and observations. Selected execution checkpoints illustrate preparing a loaded burrito, preparing an apartment for guests, and improving phone readability. The television panels compare before/after states; the phone panels magnify native controls from different screens.

This proof places the figure at the manuscript text width, followed by a 10-point caption. Screenshot details do not replace readable vector labels. The publication PDF preserves text and geometry as vectors; only simulator observations are raster images.

INTERACTIVE VISUAL GYM / FIGURE PROOF

environments_f | 5.5-inch manuscript width; view or print at 100%

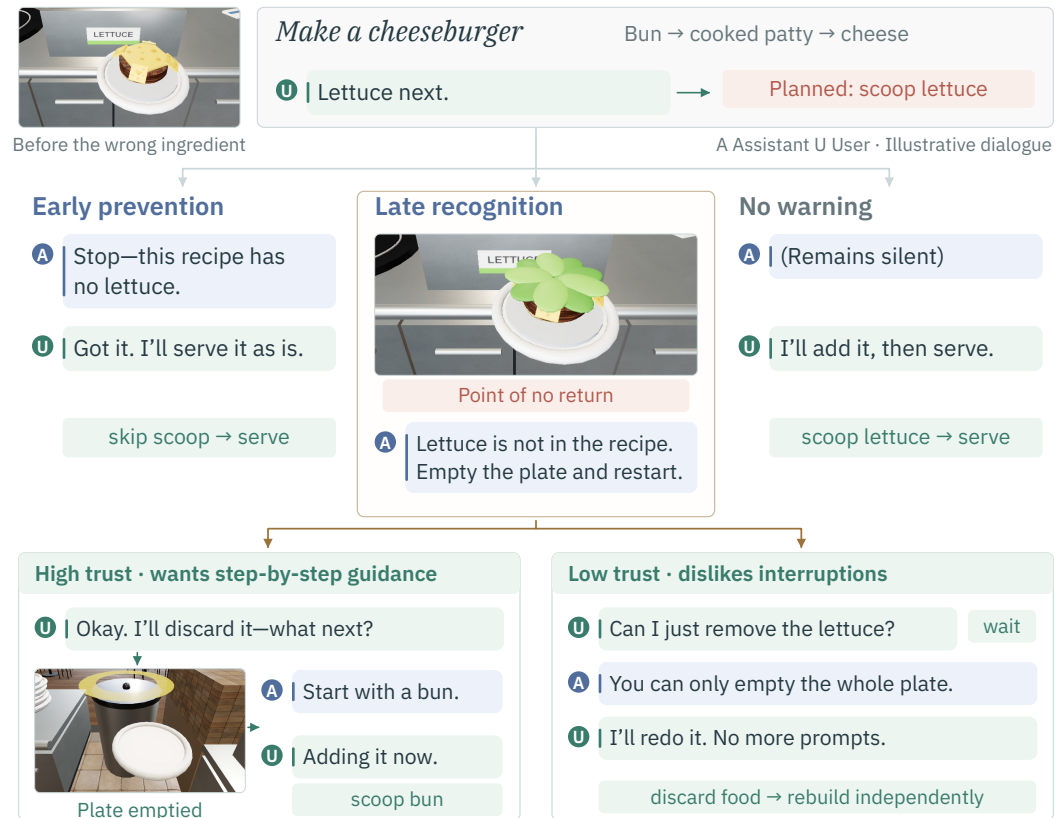

Example tasks and observations. Selected execution checkpoints illustrate preparing a loaded burrito, preparing an apartment for guests, and improving phone readability. Callouts identify action targets. The television panels compare before/after states; the phone panels magnify native controls from different screens.

This proof places the figure at the manuscript text width, followed by a 10-point caption. Screenshot details do not replace readable vector labels. The publication PDF preserves text and geometry as vectors; only simulator observations are raster images.

INTERACTIVE VISUAL GYM / FIGURE PROOF

teaser_d | 5.5-inch manuscript width; view or print at 100%

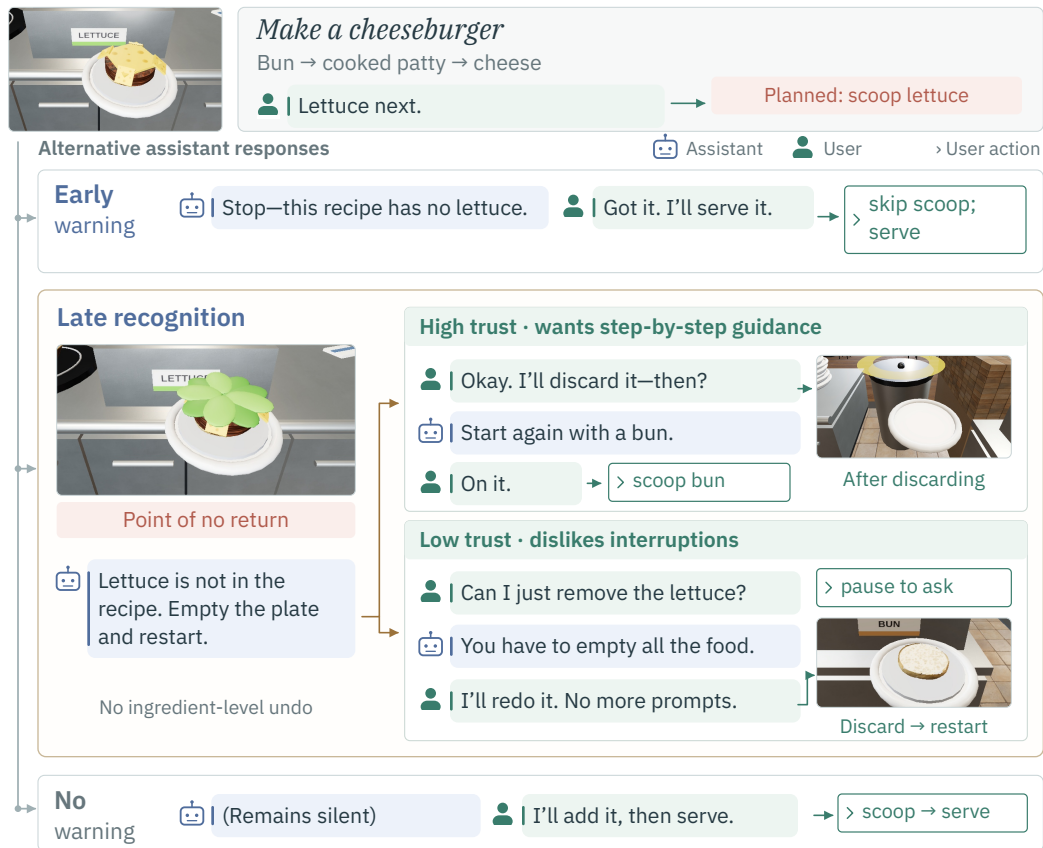

Illustrative closed-loop interaction. An impending off-recipe addition leads to early prevention, late recognition, or no warning. Only the late-recognition case is expanded into two user trajectories. Adding lettuce is a point of no return for the current plate: the engine has no ingredient-removal action, so recovery empties the food and retains the plate. Dialogue is authored; all observations are generated by executing the depicted actions in the simulator.

This proof places the figure at the manuscript text width, followed by a 10-point caption. Screenshot details do not replace readable vector labels. The publication PDF preserves text and geometry as vectors; only simulator observations are raster images.

INTERACTIVE VISUAL GYM / FIGURE PROOF

teaser_g | 5.5-inch manuscript width; view or print at 100%

Closed-loop interaction with simulated users. Early intervention prevents an off-recipe addition; late recognition prompts recovery, while silence leaves the error unaddressed. The late case is expanded to show how user personas change the conversation and subsequent actions. Authored dialogue illustrates engine-executed trajectories. Once an ingredient is plated, this simulator requires emptying the whole plate to recover.

This proof places the figure at the manuscript text width, followed by a 10-point caption. Screenshot details do not replace readable vector labels. The publication PDF preserves text and geometry as vectors; only simulator observations are raster images.
