

Simulated human error: wrong ingredient — lettuce instead of fried potato

Assistant A

At lettuce

Wait, that's lettuce. Leave it there and scoop the chips from the fryer onto your fish.

Oh, right. I'll go to the fryer instead.

Scoop chips

Assistant B

Two alternative user continuations

Scoop lettuce

You've added lettuce instead of chips. That plate won't match the order now. Take it to the trash and empty the contents; you'll keep the plate.

Okay, I'll empty it. Can you walk me through what to do next?

Empty plate

Set the empty plate on a counter, then pick up a fresh fish. We'll cook that before plating again.

Low trust · dislikes interruptions

Why throw it all out? The fish is already cooked—can't I just take the lettuce off?

You can only empty the whole plate here. It won't pass as fish and chips with lettuce on it.

All right, I'll redo it. I can handle the steps from here.
